RAJOO ENGINEERS LTD.

Rajoo engineers at Plastfocus 2024

In the vibrant realm of plastics processing technology, Rajoo Engineers Ltd. stands as a beacon of innovation and precision, spearheading the future in high-performance barrier films and compounding excellence with unparalleled sustainability. We are thrilled to announce our participation in an evolved global exhibition - PLASTFOCUS 2024 being held in Delhi, India from February 1-5, 2024, where we will showcase groundbreaking advancements that redefine the landscape of flexible packaging.

MORE NEWS

- Wins the SIES SOP star 2023 award for the PENTAFOIL-POD-AX (/en/detail-view/gewinnt-den-sies-sop-star-2023-fuer-den-pentafoil-pod-ax/)

At PLASTFOCUS 2024, Rajoo Engineers will demonstrate their exceptional ability to produce customized barrier film structures on the blown film line with sustainability as the guiding principle. Through the incorporation of PA (Nylon) and EVOH, Rajoo will expose meticulously tailored solutions to precisely meet the unique needs of the clients. This dedication ensures the production of barrier films characterized by optimal gauge variation, superior winding capability, and an unmatched level of quality. Clients who partner with Rajoo benefit from barrier film solutions that seamlessly blend sustainability with performance, offering alternatives that prioritize the environment without compromising on excellence.

Diverse High-Tech Solutions:

Rajoo's range of high-tech flexible packaging solutions in extrusion technology will be exhibited, each designed for diverse applications, including laminating grade film, thermoformable film, easy peel film, lidding film, meat/poultry packaging, milk packaging film, newspaper film, packaging for bakery products, and protective film.

Rajoo Bausano: Elevating Compounding Excellence:

As part of Rajoo's commitment to innovation, Rajoo Bausano, the joint venture with Bausano & Figli of Italy, takes pride in a forward-looking approach to compounding. Leveraging state-of-the-art technology, the compounding solutions exceed industry standards, guaranteeing high performance and quality that surpass conventional norms. Applications include PVC compounds for wires and cables, CPVC and UPVC fitting compound, fencing and gabion wire PVC compound, PVC compound for paver block, PVC flexible packaging compound, and PVC compounds for medical applications.

Join Us at PLASTFOCUS 2024:

We invite you to join us at PLASTFOCUS 2024 in Delhi, India from February 1-5, 2024 to witness cutting-edge technology and innovation that redefine the landscape of packaging. Experience firsthand how Rajoo is shaping the future of high-performance barrier films, sustainable solutions, and compounding excellence.

Thank you for being part of our journey towards a more innovative and sustainable future in plastics processing industry.
